

# Insert media into a Learning Module Page

Adding images to your webpages

## Insert media into a Learning Module Page

You can insert the following file types into a Learning Module Page:

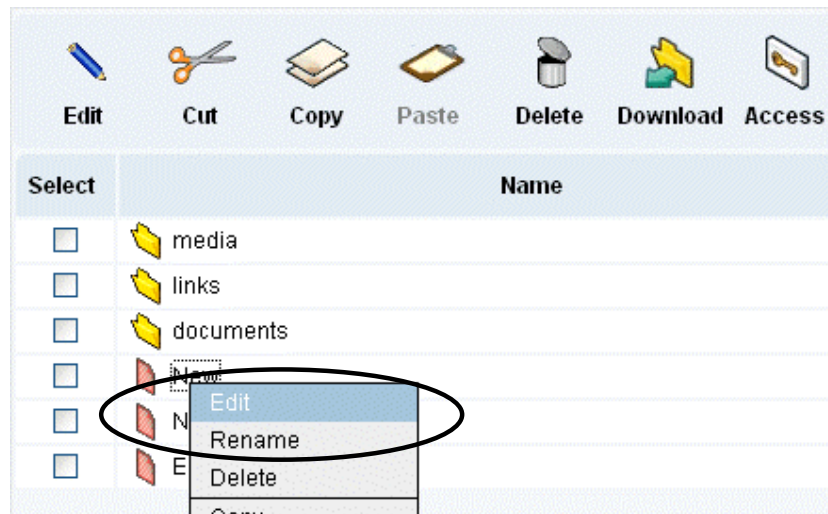

### Images

- .jpg
- .gif
- .png
- flash

### Video and Audio

- .mpeg
- .avi
- quicktime
- .wmv
- realaudio

1. In the folder listing, go to the page in which you wish to insert media.
2. Right click on the page name and select **Edit**.

3. The page editor will now be displayed. To insert the media select  Insert.
4. In the new window, browse for the file you require either elsewhere on Digitalbrain, in the Asset Bank (see the help file, **Uploading Files to Asset Bank**), or from a folder on your computer.
