

Working with Adaptations

To create any of the adaptations

1. In the folder listing, navigate to the page into which you wish to insert the adaptation, right click on the title and select 'Edit' from the drop down menu that appears.
2. This will take you to the editor, select  Adaptations.
3. To select the most appropriate template, select 'Browse Digitalbrain', which will open a new browser, listing all the available Adaptations for homepages, menu pages, presentations and puzzles.

4. To gain more information on each available adaptation click on . Once you have found the required adaptation click  to select it.
5. The adaptation will be previewed in the window below the browse feature. This is where all editing for the adaptation takes place. Follow the instructions on the template in the edit window for each page; inputting media objects, links and text then click 'Publish' and 'ok'.

To insert an Adaptation, click the "Browse Digitalbrain" button, find the adaptation you want and simply click on it to select it. You can then edit the Adaptation in the preview window. When you are complete, click the "publish" button, then click "OK" to insert it.

Working with Adaptations

6. The adaptation will now be displayed in the editor with this icon.

7. To save and exit the adaptation within the page click  then choose 'Save and Quit'.
8. To edit the adaptation again, navigate to the editor and click on the icon (as seen above), then click  Adaptations to re-edit.
