

Switching to Icon view

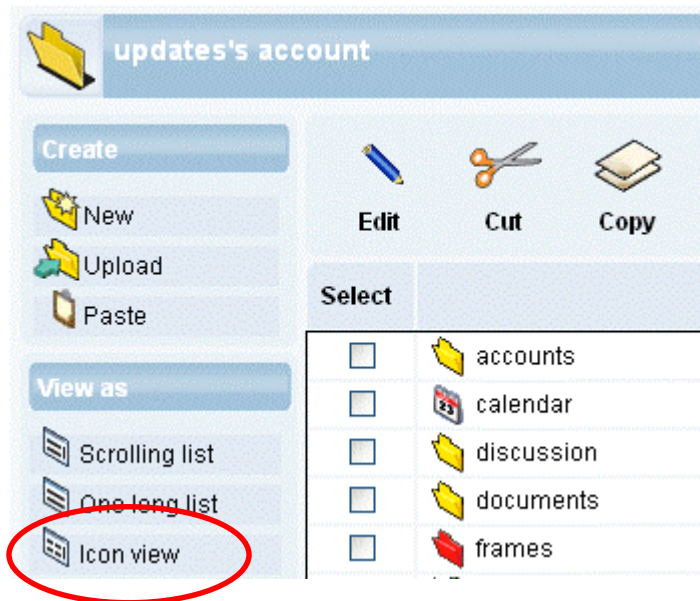

Changing the view of your file listing

The icon view provides larger click-able areas when interacting with the folder listing.

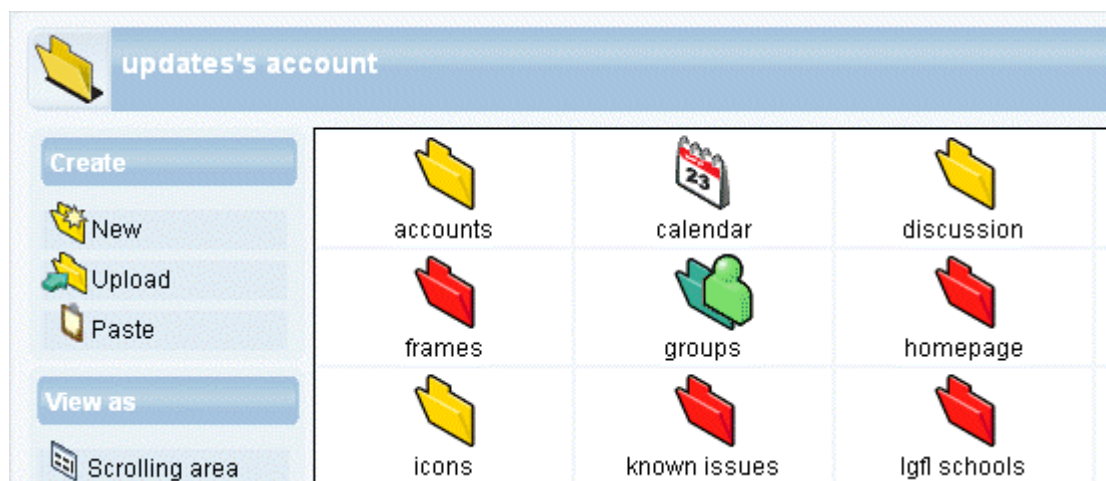

1. Log in and access your folder listing, this can be done by selecting Folder Listing

2. Once within your folder listing, select **Icon View** from the options displayed

3. This will now display an icon view similar to the one below:

Switching to Icon view

Changing the view of your file listing

4. You can now **left click** on objects to open them or **right click** to bring up a context menu for that object as shown below
