

Hiding the Digitalbrain Toolbar

Hiding the toolbar on a yellow folder

1. Log in with your digitalbrain username and password.
2. Navigate to the account containing the folder you want to hide the toolbar on. If this is your own account simply click the homepage  icon on the toolbar.

3. From the **View** menu select  Folder listing.
4. Place a tick next to the folder that **contains** the pages you don't want the toolbar displayed on   no toolbar and click **edit**.
5. From the drop down list of toolbar display options, select your preference for the pages contained within that folder.

Edit Folder

save save & quit

Show a toolbar on uploaded objects?

Let my parent folder decide 
 No - don't show the toolbar
 Yes - show the toolbar
